

Jean Louis Gaillard

Oil & Gas Project Manager & Technology Transfer Leader

Main experience in France, Africa & Central Asia

Three Key Qualifications for the Training Project Manager :

1/ Related knowledge background :

- Graduated from « Ecole Supérieure de Physique Chimie Industrielles de la ville de Paris »
- R&D in Institut Français du Pétrole (automation of oil analytical equipment)
- Oil & Gas Maintenance expert
- Distributed Control System expert

2/ Background of experience in Oil & Gas industry:

- International Manager in Oil & Gas operation & maintenance (Ipedex, Honeywell, GEC Mgt)
- Director of Engineering, Director of Maintenance & Training (Honeywell)

3/ Specific experience in training in Oil & Gas

- Coach of inspection (with Risk Based Inspection) in the Coraf (Congo) refinery
- HSE Training (training engineering, organisation and implementation) for Chad Cameroon pipeline station during construction and start-up
- OPITO certified Assessor on Operation/Maintenance/HSE for Shell Gabon Production.
- HSE & Operation training for Total Congo (Production offshore)
- Refinery Operation/HSE training for Turkmenneft (Turkmenistan)
- Training of the regional Central Asia maintenance pipelines specialist.
- Assistance in the development of the Institute National of Petroleum (Angola)
- Management of the Iranian On Scene Commanders training

The curriculum

2007 – current ACP : President – consultant

GEC Management Project Director (2017- 2018) : On scene Commanders training program for the Iranian Petroleum Ministry. Engineering and training for “Resistance to fire of steel elements, Chain of Event”.

MOU between APEC (Iran) and ACP on : Gas Flaring, EOR, Pipeline Gas leakage, Refinery optimisation, HSE training.

Study for Sonatrach & IAP (2015) concerning the graduation and qualification of the 5000 newly hired production technicians. Associated study for the Sonatrach associations (with GDF/ENGIE & Total).

Assistance (2011-2013) to the Institute National of Petroleum (Sumbe, Angola) for the improvement of the graduated and qualification education as well as for the preparation of the implementation of ISP (Institute Superior of Petroleum). Benchmarking with IFP Training, CFL Apave, IUT

Identification Study for qualification education centers in Angola (Soyo for industrial maintenance, Lobito for metallic construction and Malange for water specialisation)

2005 & 2006 ACP/Technipipe : Team Leader (projet EuropeAid)

Technical Audit of Oil & Gas Pipelines (Takis INOGATE) for the National Gas Transportation Companies in Uzbekistan, Turkmenistan, Kazakhstan, Kyrgyzstan (Uztransgaz, Turkmengaz, Intergas, Kyrgyzgaz). Technical study for the implementation of the Pipeline Network Information/Integrity System. Training plan engineering and implementation

2000 – 2004 Ipedex/Spie : Director of the oil & gas projects in the Guinea Gulf (Africa)

Management and implementation of training seminars for local operators and technicians (production, transport and treatment of petroleum products)

Management of maintenance engineering project (oil & gas production & transport installations)

Management of technical staff placed in companies for operation & maintenance

Management and implementation of safety seminars for the Chad Cameroon pipeline construction, Selection and assessment of pipeline operation team for the Chad Cameroon pipeline

Preparation of the CAPECE (Administration capability enhancement) World Bank financed training plan. Management and implementation of Cameroon administration training seminars on the Chad – Cameroon pipeline certification and right of operation.

1997 – 1999 TCPM : Project Manager formation Turkmenistan

Project feasibility study and cost estimation, Turkmenbashi Refinery Training Centre engineering, implementation and management in order to train 100 operators on the FCCU during 12 months (fundamentals, process,)

1991 - 1997 Honeywell : General Management in France, Turkey and Portugal.

Business development including for oil & gas in Azerbaidjan & Turkmenistan.

Launching of ARTEMIS partnership (Alliance of Resources for Training Engineering & Maintenance on Instrumentation & System) for developing oil & gas control application.

1973 – 1990 Honeywell : oil & gas specialist, Engineering & Maintenance Manager

Digital Control System implementation and service for oil & gas industry around the world (including Poland, Yugoslavia, China, Middle East...)

Engineering and/or maintenance of integrated solution for oil & gas such as pipeline operating information system (Trapil, 1975), Kirkuk pipeline instrumentation project (Entrepose, 1976), Elf refineries Digital Control System (Grandpuits, Donges 1978-1985), Zadco (Abu Dhabi) production Digital Control. Development of training centre, software application and service centre.

1970 – 1973 IFP (French Institute of Petroleum) :

Engineer on R&D for oil laboratory automation
